BEVERAGES

Holistic Water Purification and Comprehensive Care

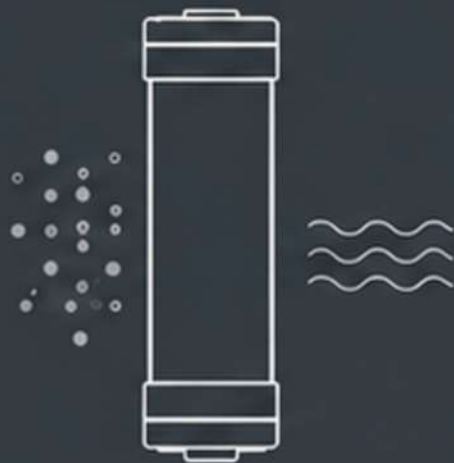

Be a Healthy Home Creator by making the most of our **6-stage filtration system** that delivers instant freshness at all times.

STAGE 01

Sediment Filter

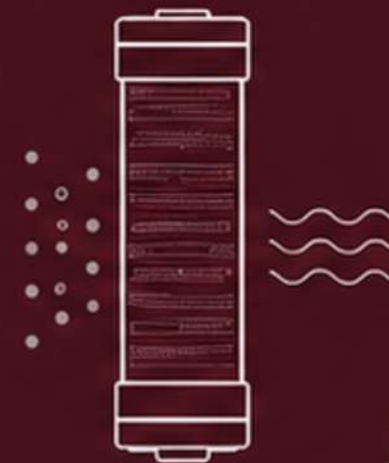

Removes dust and floating matter.

STAGE 02 03 04

Carbon Composite Filter

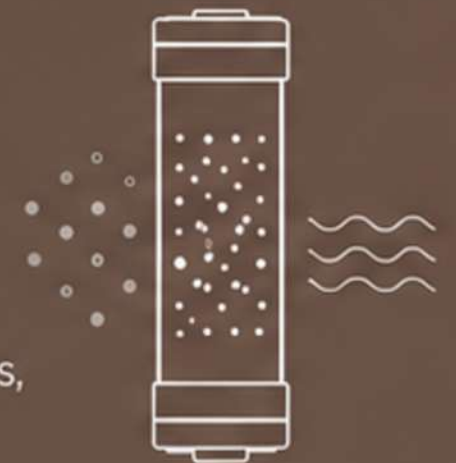

Eliminates residual chlorine, VOCs, and fine particles.

STAGE 05 06

Nano Positive Plus Filter

Helps filter out minute particles, colon bacillus, bacillus pyocyaneus, staphylococcus aureus, and Norovirus.

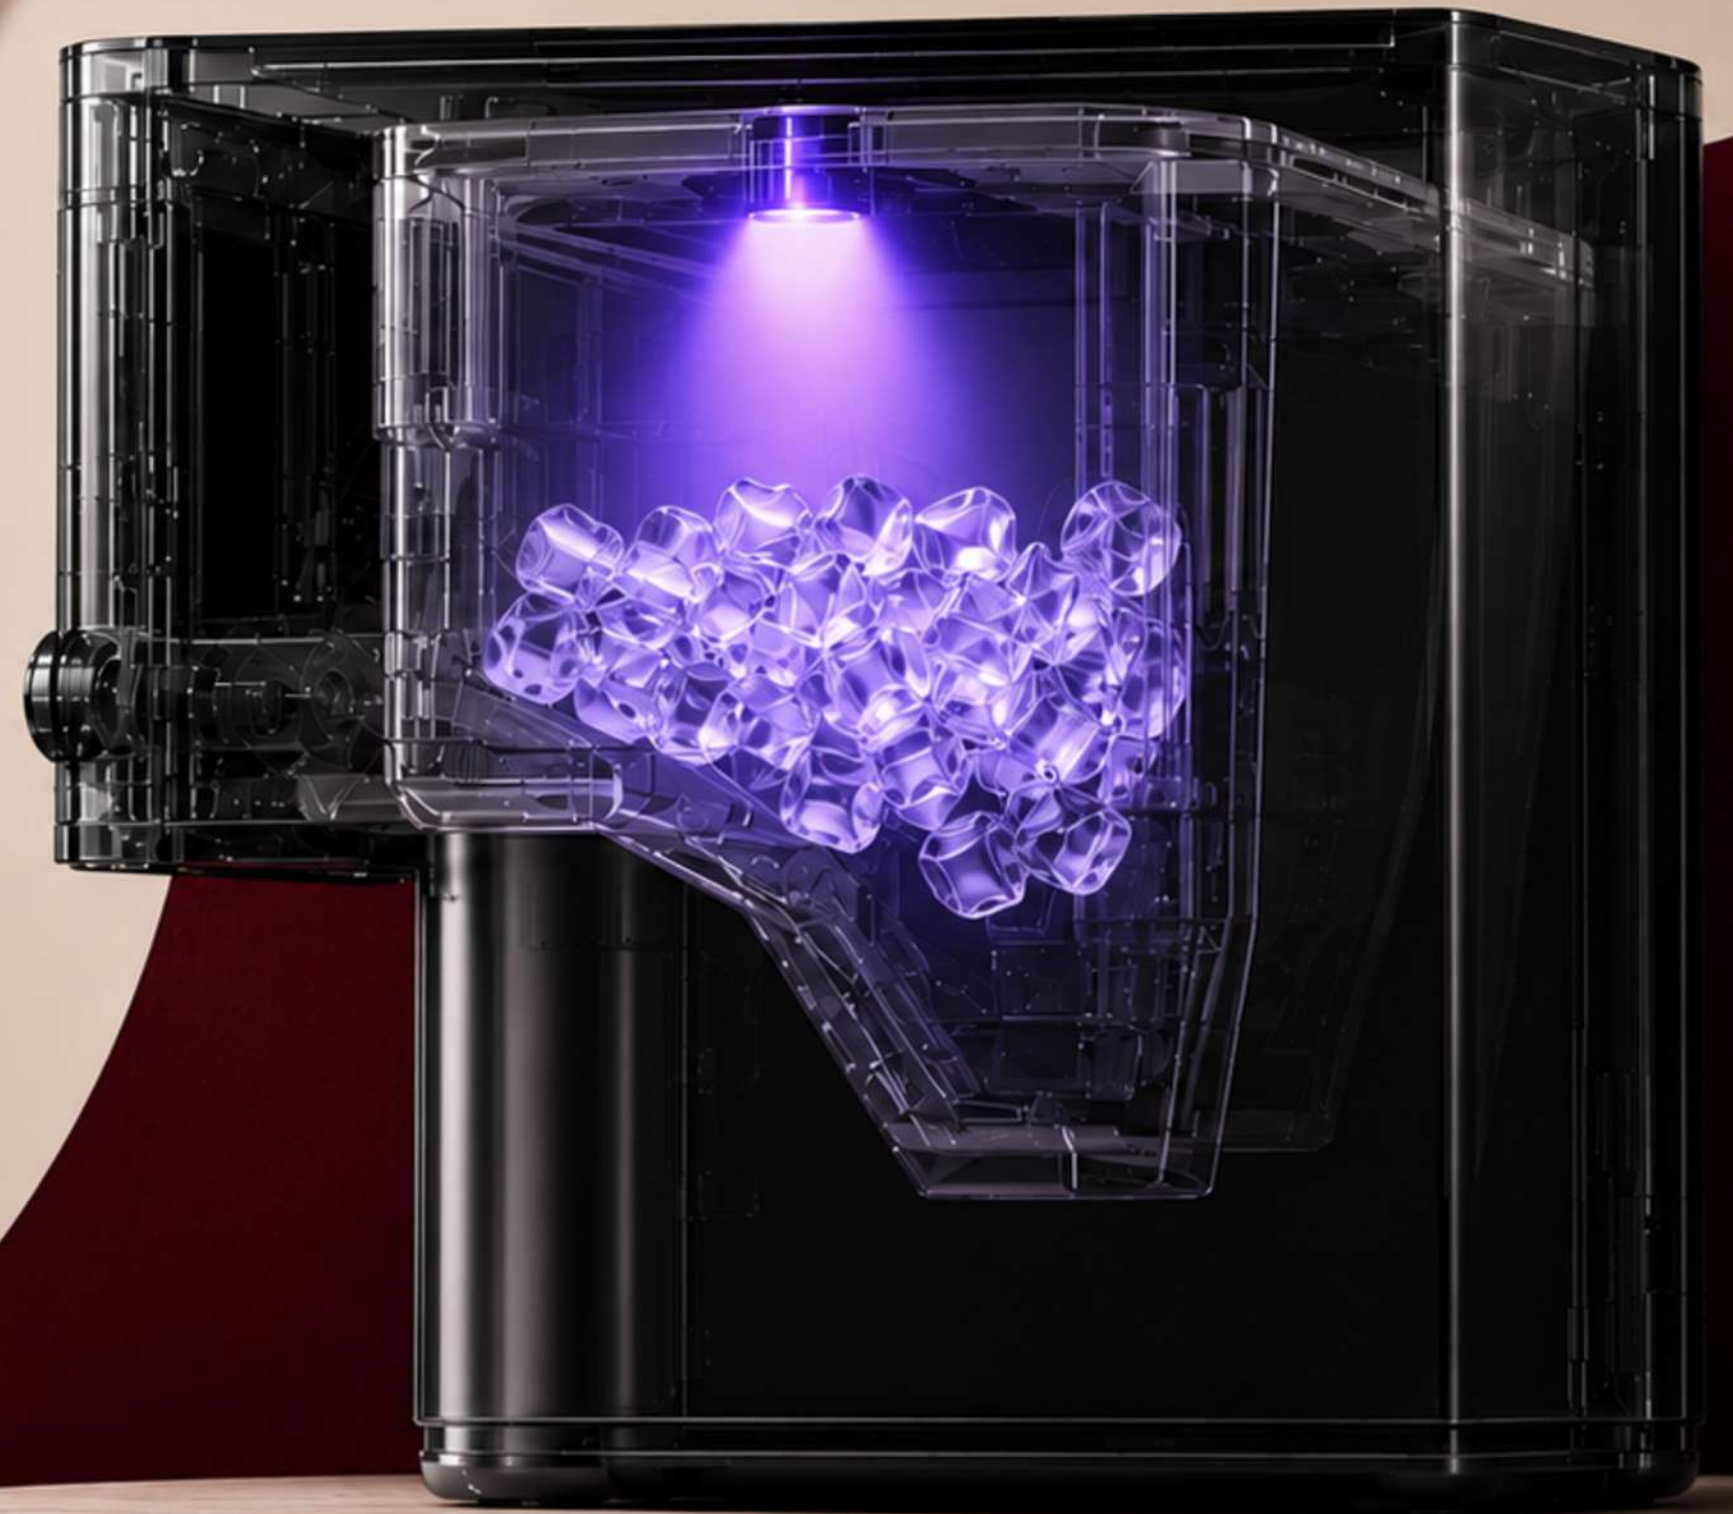

UV Sterilisation For Ice Tank.

Eliminates up to
99.9%
of bacteria from
ice & ice tank

UV sterilize ice storage tank
every 5 hours.
Sterilize **20 minutes** every times.

*Tested and proven by Korea Environment & Water Works Institute (KEWWI).
Performance may vary depending on the environmental condition of the water sources.

ALL-ROUND HYGIENE PROTECTION

In & Out Sterilisation System

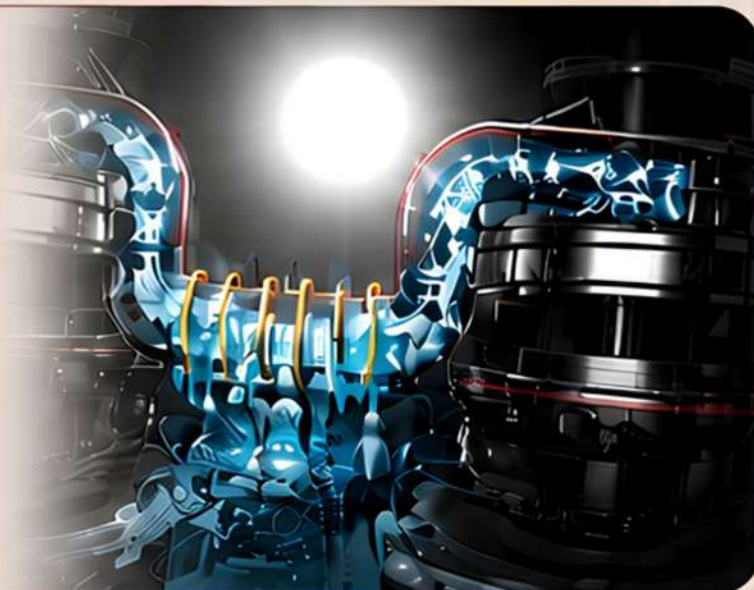

Eliminates up to
99.9%
of bacteria*

*Tested and proven by Korea Environment & Water Works Institute (KEWWI). Performance may vary depending on the environmental condition of the water sources

01

AUTO ELECTROLYSIS

Sterilises water flow
within the internal
tubing system.

**02**

INTERNAL STERILISATION

Cleans internal tubing
and ice-making
components
thoroughly.

**03**

FAUCET STERILISATION

Helps maintain a
cleaner dispensing
area for daily use.

INTERNAL STERILISATION

Keeps the internal
system clean and safe.

FAUCET STERILISATION

Helps maintain a
cleaner dispensing area.

GRANITE – How to dispense STERILISATION WATER.

Follow these simple steps to dispense **Sterilisation Water** from GRANITE.

01

Press **STERILISATION WATER** button.

(Voice Guide will say "Sterilisation water mode is selected")

02

Turn on the **Sink Faucet Valve**, and sterilisation water will flow for use.

OPTION 1: External Faucet

OPTION 2: 3-Way Diverter

Reminder to remind the customer that the sterilisation water dispensed from this outlet is **NOT FOR DRINKING.**

03

After use, close the **Sink Faucet Valve**, and Press **STERILISATION WATER** button again.

(Voice Guide will say "Sterilisation water mode is cancelled")

*After that, it will enter **Sink Faucet Cleaning Mode** for a few minutes.

*Once cleaning completed, you will hear "**Sink Faucet Line Cleaning Completed**"

STONE-COLD INTELLIGENT DESIGN

Every detail is designed
to make your life
smarter and simpler.

ENERGY EYE SENSOR

Automatically switches
to Energy Saving mode
in darkness.

ICE TANK CAPACITY INDICATOR

Know when your
ice tank is full
at a glance.

01

ICE DISPENSE BUTTON

Long press to dispense ice,
and stop when you have
the amount you need.

02

FUNCTION BUTTONS

Command GRANITE at
just one touch
of a button.

03

INTUITIVE DIAL CONTROL

Adjust water temperature
and volume easily with
a turn of the dial.

Model:	CUCKOO GRANITE	
Product Code	CP-SN100EBR	
Product Dimensions	260mm (W) x 527mm (D) x 506mm (H)	
Product Weight	21.9 kg	
Rated Voltage	Single Phase AC 220-240V / 50Hz	
	Cold	0.8A
	Hot	2400W
	Ice	150W
	Total	2550W
Filtration System	Nano Positive Filtration System	
	Sediment Filter	4 Months
	Carbon Composite Filter	4 Months
	Nano Positive Plus Filter	8 Months
Tank Capacity	Room	Direct
	Cold	Direct
	Hot	Direct
	Ice	700g
Refrigerant Type	R600a	

FAQ

FREQUENTLY ASKED QUESTIONS

PRODUCT & PERFORMANCE

**01**

How long does Granite take to produce ice?

- **Quick Ice Mode:** Approximately **18** minutes
- **Normal Ice Mode:** Approximately **30** minutes

Performance figures are based on CUCKOO Korea laboratory testing. Actual ice-making time may vary depending on surrounding temperature, incoming water temperature, and operating conditions.

**02**

Can Granite dispense hot water while making ice?

Yes. Granite is designed to perform multiple functions simultaneously.

You can dispense hot, room temperature, or cold water while the machine continues producing ice in the background.

**03**

How do I know when the ice tank is full?

When the ice tank reaches its maximum capacity, the **FULL** LED indicator lights up automatically.

Ice production will pause until ice is removed, then resume automatically when sufficient space is available.

**04**

Can I leave Ice Making mode switched ON all day?

Yes. Granite is designed for continuous daily operation.

The system intelligently manages ice production based on the ice level to optimise performance and energy efficiency.

**05**

Does Quick Ice mode reduce ice quality?

No. Quick Ice Mode shortens the ice-making cycle while maintaining the same bullet-shaped ice quality.

The difference is only the production time. Ice appearance and quality remain consistent.

FAQ

FREQUENTLY ASKED QUESTIONS

PRODUCT & PERFORMANCE

**06**

Can I remove the ice tank for cleaning?

No.

The ice tank is not designed to be removed by users.

Cleaning and maintenance should only be performed during scheduled CUCKOO+ Care Service.

**07**

Can I use Sterilisation Water for drinking?

No.

Sterilisation Water is intended for cleaning and sanitising purposes only.

It is not suitable for drinking.

**08**

Does Granite continue making ice when the ice tank is full?

No.

When the **FULL** LED indicator lights up, Granite automatically pauses ice production.

Ice making resumes automatically once ice is removed from the tank.

**09**

What should I do if I'm going on holiday or leaving home for a few days?

- Remove all ice from the ice tank.
- Store the ice in a freezer if required.
- **Switch OFF** the Ice Making function.

This helps prevent unnecessary ice production and saves energy.

**10**

Will UV Sterilisation stop when Ice Making mode is switched OFF?

No.

Auto UV Sterilisation continues to operate automatically every **5 hours**, even when Ice Making mode is switched OFF.

FAQ

FREQUENTLY ASKED
QUESTIONS

PRODUCT & PERFORMANCE

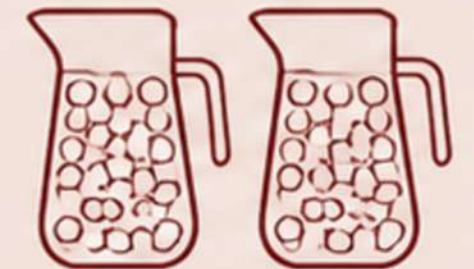

11 How much ice can Granite store?

Granite can store up to **700 g** of ice,
equivalent to approximately
100 pieces of bullet ice.

In everyday use, that's enough ice
to prepare approximately
two 1.25 L pitchers
of iced drinks.

≈ 2 jugs

**Actual results may vary depending on drink type and ice usage.*
